

BOLLFILTER Duplex Type 2.68.2/ 2.78.2

Features	This filter underlines the advantages of the weld-free simplex filter type BFB-P and also offers an even wider product range, in particular in terms of the connection sizes
Nominal diameter	DN 65 - DN 350
Switch-over	ball valve circuit (optional as a flap circuit)
Filter element	cleanable (stainless steel element) disposable (glass-fibre matting)
Grade of filtration	0,5 µm - 5 mm
Pressure stage	PN 10 / PN 40 (higher pressures on request)
Filter housing	carbon steel, stainless steel, welded stainless steel, non-welded 1.) Connecting elements Flexible connection possibilities e.g., flanged, NPT, weld-on ends, ball valves, needle valves 2.) Instruments Differential pressure connections such as optical and optical/electrical differential pressure measurement systems
General Accessories and Special Equipment	3.) Materials Filters available on request in Duplex or Super Duplex 4.) Optional equipment Cover lifting/pivoting mechanism Cover safety device
